

Chronic Care Management Program

Improving Lives and Outcomes

What is Chronic Care Management?

Chronic Care Management is a Medicare sponsored program that allows us to more closely monitor your health and well being between office visits.

How can I qualify for Chronic Care Management?

Participants must be on Medicare and have two or more chronic conditions. Ask staff if you're eligible. Here are a few qualifying conditions:

- Cancer
- Diabetes
- COPD
- Heart conditions

How does the Chronic Care Management program work?

Participation in this program will help us stay up to date on your conditions and progress. It also aids in our coordination of care with any other provider or specialist you may be seeing. Monthly phone calls, to discuss chronic conditions and treatment as directed by your provider, will allow us to improve communication and your well being between office visits.

To enroll in the Chronic Care Management program call 757-505-1853.
